THE OPTIMAL LIGHTING

The LED light sources, cold light cables and lighting rods from HIPP Endoskop Service GmbH represent the latest technologies in the field of industrial lighting. The LED light sources are characterized by high energy efficiency and long service life, which makes them ideal for permanent and reliable lighting. Cold light cables provide efficient transmission of light to hard-to-reach areas with minimal heat generation. Lighting rods are known for their direct, intense light output, making them particularly useful for precise lighting requirements. Together, these components form a comprehensive system that ensures flexibility and quality in industrial lighting.

STATIONARY LIGHT SOURCE

LED

- High light intensity and energy efficiency
- Long service life of the LEDs
- Compatibility with various borescope types
- Different color temperatures for different areas of application

MOBILE LIGHT SOURCE

5H RUNNING TIME

- Rechargeable hand-held light source
- Lithium-ion rechargeable battery
- Adjustable light intensity

COLD LIGHT CABLE

LIGHT TRANSMISSION

- Large product portfolio
- Robust due to steel sheathing
- High compatibility
- Special lengths possible

LIGHTING RODS

ILLUMINATION

- Direct and intensive light output
- Suitable for precise lighting requirements
- Various sizes and shapes for specific applications
- Durable and designed for demanding environments

HIPP Endoskop Service GmbH

Your reliable partner for industrial endoscopes

Hipp Endoskop Service GmbH is certified to DIN EN ISO 9001:2015
Certificate registration-No. 20100213013252
